ABSTRACT

LAZ Yatim Mandiri is a nonprofit organization engaged in zakat management. The use of information technology at LAZ Yatim Mandiri has been well implemented. Some operational activities have been computerized, data processing has also been integrated quite well, but there are still activities at LAZ Yatim Mandiri which still uses manual methods and there is still no IS / IT planning for the future. Thus, LAZ Yatim Mandiri requires an information system strategic planning that can maximize the performance of all operational activities at LAZ Yatim Mandiri.

The research aims to make strategic planning of information systems that is aligned with the goals and needs of the organization using the Ward and Peppard method. This method is a method that aims to produce IS / IT strategies that are aligned with the goals and needs of the organization. The results of this study will produce a portfolio of applications and information technology development that can be implemented by LAZ Yatim Mandiri in the future.

Key word: *Strategic Planning, Information System, Ward and Peppard Method.*
