***ABSTRACT***

*This study aims to examine the effect of good corporate governance and financial performance on stock prices in property and real estate sector companies listed on the Indonesian stock exchange from 2017-2018. The type of data in this research is quantitative with secondary data sources. The population of this study were all property and real estate sector companies listed on the Indonesian stock exchange until 2018. The sampling technique used a purposive sampling method. This study was assisted by the SPSS 20 software tool. The results of this study indicate that the board of commissioners has an effect on stock prices, institutional ownership affects stock prices, managerial ownership affects stock prices, financial performance (ROE) affects stock prices. And when tested together, all independent variables show that there is an influence on stock prices.*

*Keywords: good corporate governance, board of commissioners, institutional ownership, managerial ownership, ROE, stock prices*
