ABSTRACT

This research aims to examine the influence of financial literacy on risky credit behaviour which is mediated by financial self-efficacy and moderated by financial stress on Gresik students in using pay later. The population of this research were students studying in Gresik Regency with a sample of 157 students. The data analysis method uses SEM Partial Least Square. The research results found that subjective financial literacy had no significant effect on risky credit behaviour; objective financial literacy had a significant negative effect on risky credit behaviour; subjective financial literacy had a significant positive effect on financial self-efficacy; objective financial literacy had no significant effect on financial self-efficacy; financial self-efficacy has a significant negative effect on risky credit behaviour; financial self-efficacy mediates the relationship between subjective financial literacy and risky credit behaviour; financial self-efficacy does not mediate the relationship between objective financial literacy and risky credit behaviour; financial stress weakens the relationship between financial literacy subjective to risky credit behaviour; financial stress does not moderate the relationship between objective financial literacy and risky credit behaviour.

Keywords: Financial Literacy, Financial Self-Efficacy, Financial Stress, Risky Credit Behaviour
